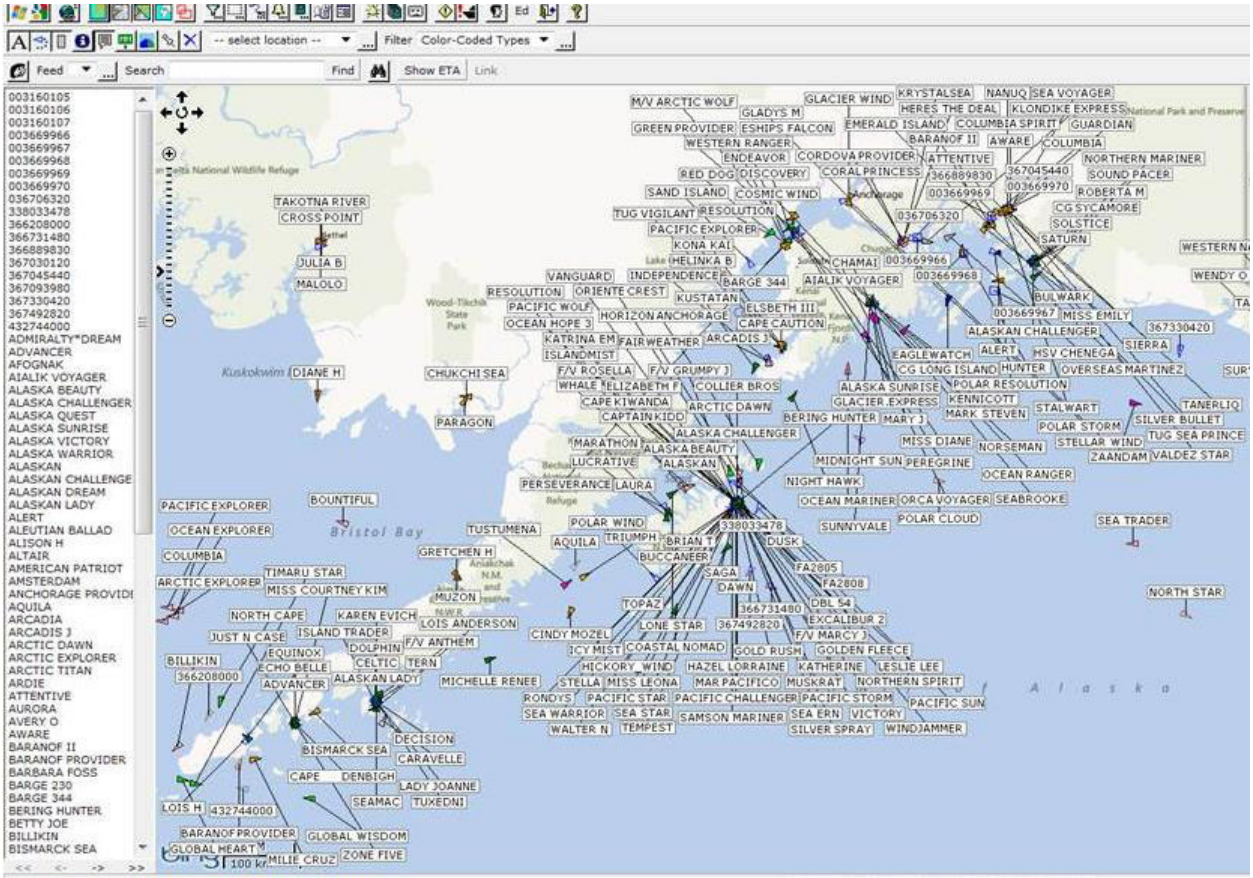
FEES FOR VESSEL TRACKING

- The fees for vessel tracking vary based on regions to which access is desired and what type of system(s) are used to track the vessel , e.g. AIS (Automatic Identification System) or Satellite transponders. The basic AIS display allows one to switch between tracking only their vessel(s) or to see all vessels and has many other features (e.g. alarms, history, etc.) The PacTracs 2.0 "User's Guide" shows the capabilities. In short, a $500 MXAK annual Associate Membership fee entitles a company or individual access to one Alaska wide AIS account. A $1,000 MXAK annual General Membership fee includes access to two accounts. A Membership application is provided on this web site.


- The fee for providing tracking of vessels via satellite transponders varies by type of equipment and number of position reports. MXAK also leases satellite equipment for a fee. Please contact Rick Sypeck at (907) 463-4650 or e-mail him at rick.sypeck@mxak.org for rates and capabilities for satellite tracking.
